

Tanks Inspection & Cleaning

Benefits

- Inspect the conditions inside the tank without interrupting water supply.
- Clean the bottom of the tank without interrupting water supply.
- No divers necessary to inspect or clean the tank deposits.
- Eliminate or reduce entry into confined spaces.
- No human contact with drinking water inside the tank.

Is it possible to clean or inspect a water tank without introducing people or taking it out of service? **ETAG Corporation** provides inspection and cleaning of water tanks without taking them out of service. Using robotic technology we can perform live underwater inspection and cleaning while video recording and documenting the activity. For more information about our Inspection & Cleaning services, you can visit our company [success stories](#) or [request more information](#) about this service.
